IRMS Education Grower/Dealer Tools

The following items may be ordered from North American Corporation (Monsanto's distribution center) by providing the product numbers listed to your local Monsanto Sales Representative or Sales Support Specialist.

Genuity® SmartStax® Cotton-Growing Area 5A6G140991

Genuity® VT Double PRO® Cotton-Growing Area 5A6G140992

Genuity® VT Triple PRO® Cotton-Growing Area 5A6G140993

Genuity® Bollgard II® Cotton IRM Grower Guide 5A5B152741

Corn Refuge Best Management Practices 5A4N163260

4 Steps Toward IRM Compliance 5A4N163261

Corn Refuge Requirements Cotton-Growing Area 5A6G140996
Before opening this bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed as set forth in the Monsanto Technology/Stewardship Agreement that you signed and in the IRM Grower Guide. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Insecticides -
Under typical growing conditions for this product, routine applications of insecticides to control the insects listed above are usually unnecessary when Genuity SmartStax corn is planted.

IRM -
To help preserve the effectiveness of B.t. corn technologies, growers planting Genuity SmartStax corn are required to follow an Insect Resistance Management (IRM) Plan. Growers are required to plant a common corn refuge for both corn borers and corn rootworms. Refuge must be planted with corn hybrids that do not contain B.t. technologies for the control of corn borers or corn rootworms. The corn refuge and Genuity SmartStax corn should be sown on the same day or with the shortest window possible between planting dates to ensure that corn root development is similar among varieties.

In the Corn-Growing Area, the refuge requirement is a minimum of 5% of the farmer's total Genuity SmartStax acres planted. In the Cotton-Growing Area, the refuge requirement is a minimum of 20% of the farmer's total Genuity SmartStax acres planted. Growers must read the IRM Grower Guide prior to planting for details on the planting of a refuge, geographical restrictions, and other requirements of an IRM Plan. Growers who fail to comply with IRM requirements risk losing access to the product.

IMPORTANT GROWER INFORMATION
PLEASE READ BEFORE PLANTING
This hybrid also contains Roundup Ready® 2 Technology and Liberty Link® technology that provide crop safety for over-the-top applications of labeled Roundup® agricultural herbicides and Ingnite herbicides, respectively, when applied according to label directions.

For sale and planting in the U.S. only. This product may not be sold, distributed or planted in Puerto Rico.

Always read and follow IRM, where applicable, grain marketing and all other stewardship practices and pesticide label directions.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup® Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate.
