

THE MONSANTO GENETIC DATABASE

THE WORLD'S LARGEST GERMPLASM LIBRARY

The number of files in our genetic database would make the more than 150 million books in the world's largest library seem small in comparison.

Think of our **GENETIC DATABASE** as:

THE LIBRARY

Plants all over the world

Contains all different types of plants

THE BOOKS

Plant Selection

Plants characterized and selected using molecular markers, fingerprinting and sequencing techniques

THE CHAPTERS

Characteristics

Characteristic Selection techniques identify areas of the plant that have desired characteristics

THE WORDS

Beneficial Genes

Plant genes are like the words
