

Exhibit 23

LIBERTYLINK[®] Is The PROVEN Solution

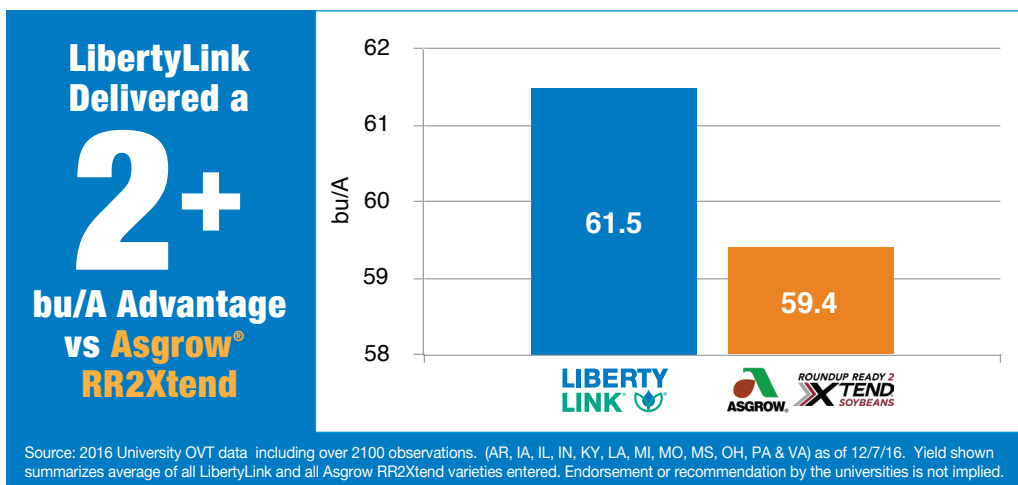

LIBERTY LINK[®]

Liberty

The newest trait technology is not always the one that offers the most yield potential or has the best weed control. LibertyLink[®] is proven to be the simply better solution providing superior weed control, high-performing genetics, application convenience and peace of mind.

SOYBEAN YIELD COMPARISON

“The next best technology is already available in the LibertyLink system.”

– Dr. Jason Norsworthy
Professor
University of Arkansas

SOYBEAN HERBICIDE TRAIT SYSTEM COMPARISON

	LibertyLink [®]	Roundup Ready 2 Yield [®]	Roundup Ready 2 Xtend [®]
System Yield Performance	PROVEN across resistant and non-resistant acres	PROVEN IF planted on non-resistant acres	UNPROVEN System in commercial environment
Weed Control	<p style="color: #0070C0; text-align: center;">CONTROLS BROADLEAF AND GRASSES</p> <ul style="list-style-type: none"> Excellent, broad spectrum control No known resistance in row crop 	<p style="text-align: center;">Controls grasses and non-resistant broadleaves</p> <ul style="list-style-type: none"> 90M+ resistant acres 16 glyphosate resistant weeds confirmed in US, several weeds pending 	<p style="text-align: center;">Controls broadleaves ONLY, NO grass control</p> <ul style="list-style-type: none"> 2 confirmed dicamba resistant weeds
Convenience and Peace-of-Mind	<p style="color: #0070C0; text-align: center;">SIMPLE TO USE, LOW-RISK and non-volatile chemistry</p>	<p style="text-align: center;">Increasing COMPLEXITY due to resistant weeds</p> <ul style="list-style-type: none"> Cross-resistant Site of Action (SOA) is growing Limited effective post control options PPO effectiveness is decreasing 	<p style="text-align: center;">COMPLEX, volatile chemistry and MORE RISK of off target movement</p> <ul style="list-style-type: none"> 110-220' buffer restrictions No spray if forecasted rain in 24 hours Restrictive wind speeds during application Sensitive crop damage and yield loss Unknown approval of tank mixes Mandated nozzle
